

- ThyssenKrupp's plant construction business has received an order from Bandirma Gübre Fabrikaları A.Ş. (BAGFAS) in Bandirma, Turkey, to supply a plant for the production of calcium ammonium nitrate fertilizer. Under the roughly €141 million contract, the new plant will be integrated into the existing facility on the southern coast of the Sea of Marmara, and is scheduled to start operation in early 2015.
